NB SONS PROFILE

Since 2000

+ 92 316 4133045
info@nbsons.com

NB SONS is a DYNAMIC and DIVERSIFIED company specialized in the production of Animal Health Products, Human Health Products, Cosmetics, Cosmeceuticals, Households, Foods and Contract Manufacturing. Our extensive portfolio reflects our dedication to deliver cutting-edge solutions making us that WE ARE NB SONS.

The Message

Dear NB Sons Team,

I hope this message finds you all in good health and high spirits. As we navigate through the ever-evolving landscape of our industry, I wanted to take a moment to reflect on our journey so far and share some thoughts on the path that lies ahead.

Our achievements over the past years have been nothing short of remarkable. Together, we have overcome challenges, embraced innovation, and delivered exceptional results that have propelled NB Sons to new heights. Our dedication to excellence, unwavering commitment to our customers, and the collaborative spirit that defines our culture have been the cornerstones of our success.

Innovation remains at the heart of our strategy. The world around us is changing faster than ever, and we must continue to adapt and lead. Let's not rest on our laurels but instead push the boundaries of what's possible, creating a future that is shaped by our imagination and expertise.

We have a responsibility to operate responsibly and contribute positively to the world around us. By integrating sustainable practices into everything we do, we not only fulfill our obligations but also lay the groundwork for long-term success.

Thank you!

Dr. Tahir Nazir
Founder / CEO

Certifications

We are proud to announce that our company is certified, reflecting our commitment to meeting and exceeding industry standards and regulations. This certification serves as a testament to our dedication to quality, integrity, and continuous improvement in all aspects of our operations. It reinforces our promise to provide products and services of the highest caliber to our valued customers.

CORE VALUES

Our Values

The culture that makes us who we are, If you talk to the people who are working with NB SONS, you'll hear many of them mention a unique environment and a 'place' that they belong.

That's no accident; it comes from a culture that we work hard to create and nurture, and that touches every aspect of what we do within the company.

It's summed up in what we call Our FOCUS: our cultural framework, describing who we are and what we strive for, why we exist, and how we work together.

Building upon this, we have our Diversity, Equity and Inclusion, and Sustainable Development frameworks.

FIT FOR LIFE
FIT FOR JOB

Physical & Mental Health

We have a wide range of measures in place to help you stay mentally and physically well in every way possible.

From office canteen serving healthy food and from in-house sports teams, NB SONS helps you look after yourself and keeping you, *'Fit for Life, Fit for the Job'*.

It's all closely tied to our belief in a holistic approach to what we do: A commitment to our people as people, not just as professionals. As a family-owned company, we think in generations and want our team members to have long careers with us.

Looking after their long-term health contributes and we also understand that our core values of empathy and respect demand that acknowledge our responsibilities to their wellness

Animal Health

Animal Health Products hold significant importance for all animals as they provide essential nutrients and bioactive compounds that promote overall health and well-being. These products can address specific nutritional deficiencies, support immune functions, and enhance the overall quality of life for animals, from pets to livestock.

Additionally, these products can play a role in preventing and managing various health conditions, making them a valuable addition to animal care.

Their multifaceted benefits contribute to the longevity and vitality of animals across diverse species.

- Poultry
- Dairy
- Aqua Culture
- Pets

Poultry Products

Growth and Development: Proper nutrition ensures that poultry birds receive essential nutrients like proteins, vitamins, and minerals necessary for optimal growth, feather development, and overall health.

Disease Resistance: Balanced nutrition strengthens the immune system, helping poultry resist diseases and infections, reducing the need for antibiotics and other medications.

Egg Production: Adequate nutrition enhances egg production and quality in laying hens, contributing to higher yields and profitability in the poultry industry.

Dairy Products

Milk Production: Proper nutrition ensures dairy cows receive essential nutrients like protein and energy to support higher milk yields, optimizing the dairy farm's productivity and profitability.

Reproductive Health: Balanced nutrition contributes to improved reproductive health in dairy cows, resulting in shorter calving intervals and increased herd size, which is essential for sustainable milk production.

Cow Health and Longevity: Adequate nutrition supports overall health, reducing the risk of diseases and ensuring longer lifespans for dairy cows, which means more productive years and better returns for dairy farmers.

Dairy Products

Sr. No.	Product	Description
1	Nfagest	An effective mineral mixture formula with gentian root extract for prevention of ruminal acidosis and stimulation of rumen functions. Perfect for high milk production, normal bone & teeth formation, maintenance of osmotic balance, normal reproductive functions, haemoglobin synthesis, carbohydrate metabolism and normal functioning of epithelial tissues.
2	Compomix	A unique vitamins and mineral Premix that is highly efficient and used to enrich combined feeds and foods of all farm animals to increase their productivity to fulfil respective nutrient requirements of dairy cattle, irrespective of the age, breed, reproductive stage or even the stage of lactation. It is mostly effective when used regularly in recommended doses.
3	Milrano	Unique fat soluble vitamins and mineral Premix that is highly efficient and used to enrich combined feeds and foods of all farm animals to increase their productivity to fulfil respective nutrient requirements of dairy cattle, irrespective of the age, breed, reproductive stage or even the stage of lactation. It is mostly effective when used regularly in recommended doses.
4	Desmin	One of the best dairy feed supplements for the production and growth of livestock animals. It aims to keep animals in the best of their health. Trace Minerals are very much required in a regular diet for animals. Desmin offers a complete quality-based composition to positively impact bone development, immune function, fetal development, muscle development, fertility, nervous system function, production of milk and hoof, and skin and hair quality.
5	Nfazyme	A feed additive with amino acids and minerals for dairy cattle and goats. It help to maintain metabolism and a healthy body and balances amino acids & minerals, and other nutrient deficiencies in cattle. It is helpful for faster and healthier growth, resistance, and immunity building and peak production & body weight. It is a vital feed additive that is quite helpful and a formula for instantly boosting overall health and It is an instant energy booster.
6	Nfaminal	A complete feed premix with vitamins and minerals for all species of dairy. It helps to maintain metabolism and a healthy body and balances minerals, and other nutrient deficiencies in cattle. For faster and healthier growth, resistance, and immunity building in aqua, poultry and cattle. It is helpful for peak production, body weight. It is a highly recommended for faster and healthy growth of cattle. It is a vital feed additive that is quite helpful and a formula for instantly boosting overall health and It is an instant energy booster.

Aqua Products

Growth and Performance: Proper nutrition ensures that aquatic species receive essential nutrients, promoting faster growth, improved feed conversion rates, and overall better performance in aquaculture systems.

Health and Disease Resistance: Balanced nutrition enhances the immune system of aquatic organisms, reducing susceptibility to diseases and minimizing the need for antibiotics and other treatments, thereby promoting sustainable and healthy aquaculture practices.

Quality and Marketability: Nutritional products help optimize the texture, taste, and nutritional value of the harvested aquatic products, meeting consumer preferences and ensuring higher market value for aqua-

Product

Bluwait

Description

Introducing Bluwait, the ultimate nutrition solution for your aquaculture endeavors. Packed with essential nutrients including calcium phosphate, vitamins C, A, E, and B-complex (B1, B2, B6), Bluwait ensures optimal growth and vitality in your fish. Enriched with vital amino acids, methionine, and lysine, it promotes a healthy and thriving aquatic environment. Elevate your aquaculture success with Bluwait, where nutrition meets excellence.

Pets Products

Overall Health: Proper nutrition provides pets with the necessary vitamins, minerals, and nutrients to maintain optimal health, supporting everything from strong bones and teeth to a shiny coat and robust immune system.

Energy and Vitality: Balanced diets ensure pets have the energy and vitality needed for daily activities, play, and exercise, contributing to their overall well-being and preventing obesity-related health issues.

Longevity: Nutritional products tailored to a pet's specific needs can help extend their lifespan and improve their quality of life, reducing the risk of age-related illnesses and promoting a healthier, happier pet.

Human Health

Addressing Human Health holistically, we specialize in General, Gynecological (Gyne), and Pediatric (Peads) care, ensuring comprehensive well-being for all ages and stages of life. Your health, our priority.
